## adding style with pets

Love your home? Love your pets too? It may sound superficial but you decide to overhaul your home, you spend time and money making it look great and then you have to add a rather ugly looking cat or dog bed into the decor!

Well those days are over. Finally you can love both in harmony. A Danish company called Pet Interiors has designed an amazing line of pet beds that would look stylish in any space. Check out [www.pet-interiors.de](http://www.pet-interiors.de) for an amazing range of well designed and quality made pet beds. I am especially fond of the retro looking cat beds.

## ABOUT ME

**JAZZ WAHEED**

Originally from London England I have been living in the diverse and vibrant city of Montreal since 2003.

[VIEW MY COMPLETE PROFILE](#)

I began renovating property in London in 1995. London is a very edgy and creative city for all home inspirations but in 2002 I came to Canada on vacation and knew almost immediately that I wanted to emigrate here. After traveling cross country I chose Montreal due to its diverse and vibrant feel. This blog is a channel for my desire for all things design. My favourite pastime is finding real gems that people throw out and giving them a new lease of life.
